# HARSH KUMAR

BCA Student | Aspiring AI Engineer | Java & Computer Vision
[Phone] | [Email] | [LinkedIn] | [GitHub] | [Location]

## PROFILE

BCA student with a strong interest in Artificial Intelligence and software development. Currently building a foundation in Java, DSA, SQL, Python, and computer-vision based applications. Hands-on project experience includes OpenCV, GUI development, MySQL, face recognition, and real-time detection systems.

## EDUCATION

**Bachelor of Computer Applications (BCA)** — Currently in Semester 3
[College / University Name] — [City, State]

## TECHNICAL SKILLS

- **Programming:** Java, Python, C, C++
- **Web:** HTML, CSS, JavaScript
- **Database:** SQL, MySQL
- **Interests:** Artificial Intelligence, Computer Vision, Software Development

## PROJECTS

**Smart Attendance System** — Python, OpenCV, face recognition
- Face-recognition attendance workflow with CSV-based attendance records.

**Fire Detection System** — Python, OpenCV, Tkinter
- Real-time fire detection using HSV-based image processing, GUI controls, and an alert sound.

**Driver Drowsiness Detection** — Computer Vision
- Webcam-based driver-monitoring application with browser-side user information storage.

**Pizza Ordering Application** — Python, CustomTkinter, MySQL
- Registration, login, food selection, billing, address/delivery flow, and MySQL integration.

## ACADEMIC / HACKATHON EXPERIENCE

- Worked on AI-based project concepts involving route intelligence, incident reporting, location-based alerts, and monitoring workflows.

## CAREER OBJECTIVE

To grow as an AI Engineer by strengthening Java and DSA fundamentals, database skills, and practical AI/computer-vision development while building useful real-world software projects.

## DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.

**Harsh Kumar**
